 - **Example:** youringtonename.m4r
-

II Transferring Ringtones to your Cell Phone

Support for your phone : [T-mobile](#) [Sprint](#) [Verizon](#) [Altel](#) [AT&T](#)

Send as text message

- Standard text messaging rates will apply plus an additional charge from the provider you are using.

USB

For your iPhone

Locate the file in your 'C' Drive

Double click on the file, and iTunes will load it into your Ringtones folder.

Now, just sync your iPhone to your computer with the USB and the ringtone will load onto your phone.

For all other phones

Open the Start Menu at the bottom left hand side of your computer screen. Open "My Computer" (or "Computer" if you are using Vista).

Under "Devices with Removable Storage" you will see an icon related to your phone. Double-click to open and you will see all of the content that is saved on your phone.

You now have to find the folder that contains your phone's ringtones. If you're lucky, it will be named something like "Ringtones," but many times you may have to manually search through the cell phone folders until you find the correct one.

Once you locate it, click and drag the ringtone file from your desktop to the folder on your cell phone.

To Transfer Using Bluetooth

Do I have Bluetooth?

If you are not sure whether or not your computer has blue tooth capabilities do the following:

Click your **start menu**

Right click on **My Computer** and choose **properties**

You should now be in **device manager**

Look through the various entries for your Bluetooth device

If you don't have Bluetooth there are Bluetooth usb adapter's available that are very easy to install.

Syncing Computer to Cell phone Using Bluetooth

First off make sure you have your cell phone handy

Now click on the **Bluetooth icon** look down by your clock for an icon that looks like the one below. If no icon exists visit your **Control Panel** and click the Bluetooth icon.

Click on **Add Wireless Device** located on the top of your screen

You should see an icon for your cell phone **Select it and Click next**

****Be prepare to type a series of numbers into your cell phone**

Select **Create Pairing Code for me**

Grab your cell phone and enter in the assigned pairing code into your cell phone
Be quick about it

After you have entered in the **pairing code** your cell phone should prompt you to confirm the pairing request **(or something to that effect)**

If you don't get it the first time its ok that's what the **try again** button is for.

Transferring your Ringtone to your cell phone

Right click on your **Bluetooth icon** (look by your clock)

Select send file then select your **cell phone icon** again and hit **next**

Browse for your file and **select next** (your cell phone will ask you if you want to exchange with your computer).
